

## Metalcasty confirms its participation at FIRE SHOW 2016 for the fourth time

For the **12th FIRE SHOW | International Fire Fair**, to be held from **October 5-7, 2016**, at São Paulo Expo, in São Paulo, **Metalcasty**, dedicated to the manufacture and marketing of equipment for firefighting, will show complete solutions in hydraulic, high and low pressure fire extinguishers and the line FLEXCASTY with certified hoses for exposure.

André Castilho, Director of Metalcasty comments on Company's participation. *"Being in the show is essential to present to the market everything Metalcasty can offer, in addition to further strengthen the relationship we have with our customers and partners"*.

Recently, Metalcasty announced its own manufacturing of high-pressure fire extinguishing line (CO<sub>2</sub>) with 4kg and 6kg to the market. These extinguishers are optimal for extinguishing Class B and/or C fires. When it comes to launches, Metalcasty also will bring the low-pressure extinguishers models: pressurized water and dry chemical, BC and ABC types.

FLEXCASTY hoses belonging to own manufacturing line are made respecting all ABNT-NBR 11861 Standards (Brazilian standard that addresses the constructive aspects and performance of firefighting hoses). Their textile reinforcement is made in 100% high tenacity polyester yarn.

"*FIRE SHOW is known for presenting launches and Metalcasty brings as a novelty the own manufacture of high-pressure extinguishing line (CO2) with 4 kg and 6 kg and low-pressure extinguishers (pressurized water and dry chemical types BC and ABC) this year*", stresses Castilho.

In each edition, FIRE SHOW brings new technologies and content that add positively to this Sector. In addition to the products displayed, specific lectures on systems, equipment and new technologies will be part of the official program as the **Brazilian Congress of Fire Engineering (Congresso Brasileiro de Engenharia de Incêndio - COBENI)** that will bring as central theme "*The engineering of protection against fire in pursuit of the qualification and professional training*". The Program "**Vulnerability Mapping in Fire Prevention**", aims to provide participants with tools and theoretical and practical knowledge about how to map the real situation of vulnerability in fire prevention and, therefore, apply corrective means in a cost-effective manner in the elimination or mitigation of risks. Moreover, **TECHSHOW** will be carried out with free schedule of lectures of content and update given by exhibitors.

Held by **Cipa Fiera Milano** with support of the Brazilian Association of Equipment Against Fire and High Pressure Cylinders (**ABIEX**), Fire Show 2016 will present solutions to all industry in the areas of rescue and preventing the fires, bringing products for detection, alarm, and extinguishing the fire; fire propagation and firefighting equipment such as hoses and foam; portable extinguishers, automotive and chemical powder; manometers, valves and accessories for fire extinguishers, among others.
